

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Eleva European Selection Fund - Class I (GBP) acc. (hedged)

(ISIN:LU1111643471) Eleva European Selection Fund (the 'Fund') is a sub-fund of Eleva UCITS Fund (the 'Company')

Eleva Capital S.A.S. is the management company (the 'Management Company') to the Company.

Objectives and Investment Policy

- The Fund seeks to achieve superior long term risk adjusted returns and capital growth by investing primarily in European equities and equity related securities.
- The Fund will seek to invest in companies which it considers to have attractive growth prospects over a three to five year period not reflected in its current trading price or which have low valuation multiples that have the potential to revert to the mean over time.
- The Fund predominantly invests its net assets in the equity of corporate issuers with their registered office in Europe.
- The Fund will not invest more than 10% of its assets in Russian or Turkish equities or equity related securities.
- The Fund is actively managed with reference to a benchmark. The Stoxx Europe 600 EUR (Net Return) has been internally chosen for performance comparison and risk measurement purposes. The Fund's holdings and the weightings of securities in the portfolio will consequently deviate from the composition of the Benchmark.
- STOXX is a benchmark provider authorised by the ESMA. The Stoxx Europe 600 EUR (Net Return) represents large, mid and small capitalization companies across 17 countries of the European region: Austria, Belgium, Denmark, Finland, France, Germany, Ireland, Italy, Luxembourg, the Netherlands, Norway, Poland, Portugal, Spain, Sweden, Switzerland and the United Kingdom (stoxx.com/index-details?symbol=SXXR).
- The Fund may use Financial Derivative Instruments (instruments whose prices are dependent on one or more underlying assets 'FDIs') in order to reduce the possibility of financial losses or to achieve higher gains.
- The Fund may enter into securities lending transactions. Sale of shares in the Fund can be made on any business day.
- This Share Class is denominated in British Pounds and is hedged against the EURO.
- The Share Class does not intend to distribute dividends. Any income arising from the Fund's investments is reinvested and reflected in the value of this Share Class.
- Recommendation: this Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and Reward Profile

- The lowest category does not mean a risk free investment.
- The risk and reward profile shown is not guaranteed and may change over time.
- As this Fund has less than five years performance data available, it is based on simulated volatility and is not a guide to the future risk and reward category of the Fund.
- This share class is in category 6, since the share price has a high volatility therefore the risk of loss as well as the expected reward can be high.

The following risks may not be fully captured by the risk and reward indicator:

- Counterparty Risk:** The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Currency Risk:** As the Fund invests in securities denominated in a number of different currencies, movements in exchange rates may, when not hedged, cause the value of the investments to increase or decrease.
- Derivative Risk:** Derivative values can rise and fall at a greater rate than equities and debt instruments. Losses can be greater than the initial investment. This risk is minimised by holding a

diverse selection of non-derivative instruments.

- Equity Risk:** The risk that investments depreciate because of stock market dynamics.
- Market Risk:** The Fund's assets may decrease because of sovereign acts and political transformation, which may also influence free trade of currency. In addition, risks may arise because of restricted information possibilities in addition to less stringent supervision and control of certain markets. The performance of these markets may be subject to significant volatility.
- Hedging Risk:** The share class hedging may not be perfect. Whilst hedging is performed to minimise exchange rate risk at the share class level, no guarantee can be offered that these are perfectly hedged.

A complete description of risk factors is set out in the prospectus of the Company in the 'Risk Factors Annex'.

Charges
