Investment Objective & Philosophy

The objective of the Sub-Fund is to provide long-term capital appreciation. To achieve this objective, the Sub-Fund invests, under normal circumstances (except when maintaining a temporary defensive position), at least 80% of the value of its net assets in publicly traded equity securities of businesses that the portfolio managers believe are benefiting from or have the potential to benefit from advances in the use of artificial intelligence. Artificial Intelligence ("AI") refers to the development or use by a business of computer systems that perform tasks previously requiring human intelligence such as decision-making or audio or visual identification or perception.

RISKS

The Share Class is assigned to this risk category because of price variations resulting from its currency and the nature of the Sub-Fund's investments and strategy. The above rating is based on the historic volatility of the Share Class and may not be a reliable indication of the future risk profile of the Share Class. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Equity investments entail equity risk and price volatility risk. The value of stocks and other equity securities will change based on changes in a company's financial condition and in overall market and economic conditions. Funds investing in mid and small cap companies involve special risks including higher volatility and lower liquidity. The Fund may be susceptible to the impact of market, economic, regulatory, and other factors affecting the technology sector because of its concentrated investments in companies expected to benefit from the rising influence of artificial intelligence. At times of such impact, the value of the Fund may fluctuate more widely than it would for a fund that invests more broadly across varying sectors. The Fund may be more susceptible to any single economic, political or regulatory event than a diversified fund because a higher percentage of the Fund's assets may be invested in the securities of a limited number of issuers. Investments in foreign securities may involve greater risks than investing in U.S. securities due to, among others, less publicly available information, less stringent and less uniform accounting, auditing and financial reporting standards, less liquid and more volatile markets, higher transaction and custody costs, additional taxes, less investor protection, delayed or less frequent settlement, political or social instability, civil unrest, acts of terrorism, and regional economic volatility.

GENERAL

This marketing document is issued by TCW Funds (the "Fund"). It is neither directed to, nor intended for distribution or use by, any person or entity who is a citizen or resident of or located in any locality, state, country or jurisdiction where such distribution, publication, availability or use would be contrary to law or regulation.
