TCW Global Premier ESG Equities Fund a sub-fund of TCW FUNDS

Class AEHE
ISIN: LU1848748817

Management Company: Came Global Fund Managers (Luxembourg) S.A.

Objectives and Investment policy

The objective of the Sub-Fund is to provide long-term capital appreciation.

To achieve this objective, the Sub-Fund invests in a portfolio of companies the portfolio manager believes are enduring, cash generating businesses whose leaders prudently manage their environmental, social, and financial resources and whose shares are attractively valued relative to the free cash flow generated by the businesses. The Sub-Fund invests at least 80% of its net assets in equity securities of U.S. companies.

Equity securities include common and preferred stock; equity securities of foreign companies listed on established exchanges in the U.S., including NASDAQ; American Depositary Receipts (ADRs); securities that may be converted into or exchanged for common or preferred stock, such as convertible stock, convertible debt, preferred stock, Eurodollar convertible securities, warrants and options; and other securities with equity characteristics. The Fund will typically invest a portion of its assets in securities or other financial instruments issued by companies in the financial services sector, including, without limitation, the banking, brokerage and insurance industries. The Fund will invest in equity securities of companies of any size.

The portfolio manager seeks to invest in what he considers to be attractively valued equity securities of cash generating businesses with prudently managed environmental, social, and financial resources. The portfolio managers use both qualitative and quantitative screening criteria to supplement the fundamental research.

Risk and reward profile

The shaded area in the table above shows the Class' ranking based on the Synthetic Risk and Reward Indicator. The risk/return indicator suggests the relationship between risk and potential returns when investing in the Sub-Fund. This Share Class has a ranking of 5, which indicates that there is typically a higher risk for up and downturns in the net asset value. This ranking is typically used to indicate a level of risk that is greater than other Sub-Funds that invest in assets such as bonds issued by organizations with high credit quality domiciled in developed markets, but less than Sub-Funds that invest in assets such as equity.

Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. Category 1 does not mean a risk-free investment.

The following risks are materially relevant to the Sub-Fund but are not adequately captured by the synthetic indicator and may cause additional loss: "liquidity risk," "credit risk," "counterparty risk," "cross-liability risk," and "operational risk".

Benchmark: MSCI World (USD) Index

Geographical constraints: N/A

Currency hedging: This Share Class is denominated in EUR and hedged against the exchange risk between the Sub-Fund's base currency and the EUR.

Net asset value calculation frequency: Net asset value calculation frequency: Daily, any full working day in Luxembourg when the banks are opened for business, the New York Stock Exchange is open and when the markets on which the majority of the Sub-Fund' s portfolio is invested are open.

The Shares are capitalized. In consequence, unless specifically decided otherwise, no dividends are distributed to the shareholders.

Recommendation: The recommended investment period in this Sub-Fund is medium to long term.

- Liquidity risk refers to the possibility that the Sub-Fund may lose money or be prevented from earning capital gains if it cannot sell a security at the time and price that is most beneficial to the Sub-Fund.

- Credit risk refers to the likelihood of the Sub-Fund losing money if an issuer is unable to meet its financial obligations, such as the payment of principal and/or interest on an instrument, or goes bankrupt.

- Counterparty risk refers to the fact that individually negotiated or over-the-counter derivatives, such as swap agreements or currency forwards, are subject to counterparty risk, which is the risk that the other party to the contract will not fulfill its contractual obligations, which may cause losses or additional costs to a Sub-Fund.

- Cross-liability risk: While there is no cross-liability between Sub-Funds under Luxembourg law there can be no assurance that such provisions of Luxembourg law will be effective in other jurisdictions. There is cross-liability between Classes of the same Sub-Fund.

- Operational risk refers to a failure or delay in the systems, processes and controls of the Sub-Fund or its service providers (including all safekeeping of assets) which could lead to losses for the Sub-Fund.

Charges

The charges are used to pay the costs of running the Sub-Fund, including the costs of marketing and distributing the Sub-Fund. These charges reduce the potential growth of the investment.

One-off charges taken before or after you invest

Entry charge	Up to 4,5%
Exit charge	None

This is the maximum percentage which might be deducted from your capital commitment to the Sub-Fund. In some cases, you might pay less. You can find out the actual entry and exit charges from your financial adviser or distributor. The entry charges are deducted before your capital is invested.
