

TCW Core Plus Bond Fund
a Sub-Fund of TCW Funds

Class: IEHE
ISIN: LU1145152564

Management Company: Carne Global Fund Managers (Luxembourg) S.A.

Objective and Investment Policy

The objective of the Sub-Fund is to seek to maximize long-term total return by investing in investment grade fixed income securities and/or unrated securities that are determined by the Investment Manager to be of similar quality.

To achieve this objective, the Sub-Fund invests in investment grade fixed income securities or unrated fixed income securities that are determined by the Investment Manager to be of similar quality, and in derivative instruments that provide investment exposure to such securities for at least 80% of its net assets. Up to 20% of the Sub-Fund's net assets may be invested in securities rated below investment grade.

The Sub-Fund may purchase securities of varying maturities issued by domestic and foreign corporations and governments. The Investment Manager will focus the Sub-Fund's portfolio holdings in areas of the bond market that he believes to be relatively undervalued.

Investments include various types of bonds and other securities, typically corporate bonds, notes, collateralized bond obligations, collateralized debt obligations, mortgage-related and asset-backed securities, bank loans, money-market securities, swaps, futures, municipal securities, options, credit default swaps, private placements and restricted securities. These investments may have interest rates that are fixed, variable or floating.

The Sub-Fund may also invest in other instruments include bonds and money market instruments other than those mentioned above; convertible bonds; equities and equity-linked instruments; units/shares of UCITS and/or other UCIs up to 10% of the net assets; deposits; and MBS and ABS for a maximum of 100% of its net assets and other financial derivative instruments.

The Sub-Fund is actively managed. An actively managed fund is a

fund in which the investment manager makes decisions about how to invest the fund's capital.

Benchmark: Bloomberg Barclays U.S. Aggregate Bond Index. The Sub-Fund is not constrained by the benchmark.

Geographical constraints: U.S. and abroad, including Emerging Market Countries.

Currency hedging: This Share Class is denominated in EUR and hedged against the exchange risk between the Sub-Fund's base currency and the EUR.

Net asset value calculation frequency: Daily, any full working day in Luxembourg when the banks are opened for business, the New York Stock Exchange is open and when the markets on which the majority of the Sub-Fund's portfolio is invested are open.

The shares are capitalized. In consequence, unless specifically decided otherwise, no dividends are distributed to the shareholders.

Recommendation: The recommended investment period in this Sub-Fund is medium to long-term.

Risk and Reward Profile

The shaded area in the table above shows the Class' ranking based on the Synthetic Risk and Reward Indicator. The risk/return indicator suggests the relationship between risk and potential returns when investing in the Sub-Fund.

Historical data, such as is used in calculating the synthetic indicator, may not be a reliable indication of the future risk profile of the Sub-Fund. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. Category 1 does not mean a risk-free investment.

This Share Class has a ranking of 3, which indicates that there is typically an average risk for up and downturns in the net asset value.

The following risks are materially relevant to the Sub-Fund but are not adequately captured by the synthetic indicator and may cause additional loss: "liquidity risk," "credit risk," "counterparty risk," "cross-liability risk," and "operational risk".

– Liquidity risk refers to the possibility that the Sub-Fund may lose money or be prevented from earning capital gains if it cannot sell a security at the time and price that is most beneficial to the Sub-Fund.

– Credit risk refers to the likelihood of the Sub-Fund losing money if an issuer is unable to meet its financial obligations, such as the payment of principal and/or interest on an instrument, or goes bankrupt.

– Counterparty risk refers to the fact that individually negotiated or over-the-counter derivatives, such as swap agreements or currency forwards, are subject to counterparty risk, which is the risk that the other party to the contract will not fulfill its contractual obligations, which may cause losses or additional costs to a Sub-Fund.

– Cross-liability risk: While there is no cross-liability between Sub-Funds under Luxembourg law there can be no assurance that such provisions of Luxembourg law will be effective in other jurisdictions. There is crossliability between Classes of the same Sub-Fund.

– Operational risk refers to a failure or delay in the systems, processes and controls of the Sub-Fund or its service providers (including all safekeeping of assets) which could lead to losses for the Sub-Fund.

Charges

The charges are used to pay the costs of running the Sub-Fund, including the costs of marketing and distributing the Sub-Fund. These charges reduce the potential growth of the investment.
