Investment Objective & Philosophy

The objective of the Sub-Fund is to provide long-term capital appreciation. To achieve this objective, the Sub-Fund invests primarily in equity securities of mid and large capitalization companies. Under normal circumstances, the Sub-Fund invests (except when maintaining a temporary defensive position) at least 80% of its net assets in equity securities. Portfolio securities may be sold when a company fails to meet expectations or when the portfolio manager determines it is in the interest of the Sub-Fund's investments. The Sub-Fund will also invest in other instruments which include repurchase and reverse repurchase agreements, investments in units/shares of UCITS and/or other UCIs up to 10% of the net assets and in deposits.

RISKS

The Share Class is assigned to this risk category because of price variations resulting from its currency and the nature of the Sub-Fund's investments and strategy. The above rating is based on the historic volatility of the Share Class and may not be a reliable indication of the future risk profile of the Share Class. The risk and reward category shown is not guaranteed to remain unchanged and may shift over time. The lowest category does not mean a risk-free investment.

Equity investments entail equity risk and price volatility risk. The value of stocks and other equity securities will change based on changes in a company's financial condition and in overall market and economic conditions. Growth stocks may be more volatile than other stocks because they are more sensitive to investor perceptions of the issuing company's growth potential. Portfolio management risk is the risk that an investment strategy may fail to produce the intended results.
